The all-inclusive logistics puzzle:

plastic containers and logistic
applications for production, storage,
distribution and point of sale.

## Put your eggs in the right basket

wez Logiline: for perfect handling.
wez LogiLine products are made of extremely tough polypropylene plastic for long life and dependability. LogiLine containers in all shapes and sizes help to optimise logistics costs and efficiency in industry, trade and commerce worldwide. All wez LogiLine containers are guaranteed for $\mathbf{5}$ years against material flaws and faulty production.

Good products are well protected in wez LogiLine containers. Whether bulk solids or sensitive components, industrial products or foodstuffs of all kinds - LogiLine containers, crates, bottles and packets fit them all. In a wide range of sizes and versions, with practical handling accessories for production, transport, distribution or point of sale.

## LogiLine: to protect your products

Returnable plastic containers not only save money - they also make ecologically sense. Whatever the application, in the wez LogiLine range you will find the right container. Together with our well proven accessories for everyday handling, your products are well looked after right through manufacturing, storage and transport.

LogiLine takes care of your prod ucts from start to finish wez

wez Logiline: ready for the future
Meeting with new requirements while retaining well proven concepts is a basic principle of the LogiLine concept. This includes strict compliance with our modular principle and consistently high product quality (certified to ISO 9001:2000). consistently high product quality (certified
wez Logiline keeps you abreast of times.

Logistics change rapidly these days. Logistics change rapidy these days. cesses demand container systems with the utmost flexibility and compatibility. With wez LogiLine, only ne container is often needed from production to point of sale - another
reason for the growing popularity of this modular wez concept.

Wez

With a hot-printed logo your products show an individual look. The corporate design or trademark on your containers is an efficient publicity for your enterprise (see page 28).
There are also many possibilities for labelling, or attaching documents (see page 27).

wez Customised logistics solutions
We are constantly developing and implementing customer and/or appli-cation-specific system solutions from our top-quality standard products. Requirements are drawn up from ideas and specifications. Working from these, we devise the technical plan and can use 3D presentations to give an initial impression of the end-product.
Often the next step is to create a 1:1 model of the planned product. Final conclusions on functionality and design can be drawn from this model. Once all details are finalized, the production mould is designed and manufactured using the available design data.

## Standard containers with SGL base

wez-LogiLine containers comply with the European pallet norm $1200 \times 800 / 1200 \times 1000 \mathrm{~mm}$, and can be stacked any way you want, mixed as ell. Their mechanical properties and dimension tability comply with Swiss SGI recommendations. Made of polypropylene copolymer PPC they
also meet all FDA standards. Optimal useful capaciy, conicity only 2 mm . They are extremely restistant chemicals and acids, heat-resistant up to $130^{\circ} \mathrm{C}$ washable, hygienic and long-lived. Maximum stacking load is very high at 800 kg . Standard colour is grey RAL 7001 , batches of 500 and more can be supplied in any colour

ez LogiLine containers $300 \times 200 \mathrm{~mm}$ in 3 different heights, with shell grips and all-round base ribs.

wez-LogiLine containers $400 \times 300 \mathrm{~mm}$ in 6 different beights, with shell grips or 2 handle boles. Standard SGL base design.

Tez-LogiLine containers $600 \times 400 \mathrm{~mm}$ in 7 different beights, with shell grips or $2 / 4$ handle boles. Standard SGL base design.

Standard version and design of container size $400 \times 200 \mathrm{~mm}$.

GL model $6426.400(600 \times 400 \times 266 \mathrm{~mm})$ with 4 bandle boles.

## Plastic injection moulding:

our key strength.
Since 1956 we have been producing injection moulded thermoplastic components from 6 g to 6 kg in weight at our Oberentfelden manufacturing plant in the Aargau region of Switzerland. We are one of Switzerland's largest processors of plastics, with hree main product ranges:
wez Logiline: the comprehensive range of containers and accessories for all logistics requirements
wez Blackline: a full range of antistatic plastic containers, racks and packagings for the protection of electronic components.
wez Crealine: development and production of high-grade hermoplastic components and assemblies.

## Product development and toolmaking

Combining advanced tools like 2D and 3D CAD facilities with the creativity of our development specialists, designers and plastics engineers, guarantees innovative customer oriented solutions in toolmaking and product development.

## Production

We have more than 30 computerised injection moulding machines running on a 3-shift production basis, producing components and assemblies for worldwide customers. Our modern manufacturing operation includes all the necessary peripheral equipment for stamping, ultrasonic and reflector welding and ther assembly operations.
wez processes all commercial plastic types (with the exception of PVC). Trucks deliver the main material batches straight to silos which are linked directly to our production equipment.

## Quality

The product and service quality on which our customers rely is guaranteed by daily implementation of our EN/ISO 9001:2000 certified quality assurance system - from design through to production and sales.

## Warehousing and despatch

Our large warehousing facilities ensure fast delivery of our comprehensive product range to all five continents.
You are welcome to pay us a visit. We look forward to showing you how we could work together to create a successful partnership.
